

## HARD FLOOR POLISH

Hard Floor Polish is a water-based maintenance product that provides an extra protective layer to all types of varnished floors. Hard Floor Polish provides an extra protective film and hides micro-scratches, maintaining the original look of the wood. The extra protection ensures that the varnish layer is maintained longer and prevents dirt becoming ingrained. For matte floors, use Ciranova® UNICARE X-MATT.

- » Universal protection for all varnished wood floors and waterborne finishes.
- » Prevents early wear to the floor surface.

### TECHNICAL DATA

**Product type**  
waterborne

**Cleaning**  
Water

**Mixing ratio**  
Use undiluted

**Gloss level**  
Silk gloss

**PH**  
8

**Packaging**  
6 x 750 ml

**Coverage**  
60 - 80 m<sup>2</sup>/liter  
650-850 sq.ft./L  
2460 - 3220 sq.ft./gal

**Drying times**  
1 hour at room temperature

**Storage/transport**  
between 5°C and 25°C

**Disposal**  
Dispose of residue and empty packaging in accordance with local ordinances.

0,75L

### PREPARATION

Ensure that the floor is clean before applying Hard Floor Polish. To this end, you can first clean the wood with Ciranova® Hard Floor Fresh. Apply the Hard Floor Polish to a dry and grease-free surface.

### APPLICATION

Use the Hard Floor Polish undiluted. Apply the Hard Floor Polish evenly with a microfiber cloth or mop, in the direction of the wood grain. If necessary, you can apply a second layer of Hard Floor Polish after 1 hour.

### CAUTION

+/- 1 hour, depending on the amount applied, the surrounding temperature, the humidity and ventilation.

### MAINTENANCE

For regular maintenance of varnished floors and floors treated with Hard Floor Polish, use Ciranova® Hard Floor Fresh. For removing old layers of Hard Floor Polish, use Ciranova® Hard Floor Cleaner
