TECHNICAL DATA

extra component:	Water
mixing ratio:	40:10
pot-life:	ca 40 min.
density:	-
viscosity:	-
colors:	light Oak 7359; Dark 7360; Black 7363
solid content:	100%
gloss:	-
thinner:	water
coverage per coat:	depending on the knots
Coverage USA per coat:	depending on the knots
drying:	Sandable : after 30 min. - 2 hours (depending on the size of the reparation). Completely hardened after 24 hours. Drying time can be limited with higher temperatures and increased air ventilation.

PACKING

5kg

APPLICATION

preparation substrate:	Sand the surface well before treatment, remove loose pieces, make dust-free.
processing:	Choose the color most conform for the wood to be treated. Dilute the powder with clean cold water. Proportion: 1 part of water on 3 parts of powder. Mix well and wait for approximately 5 min. in order to become a homogenous paste. After preparation of the paste, the mixture can be used for about 40 minutes. Irregularities in the surface can be removed till 8 mm depth in 1 layer. For larger reparations, this treatment has to be repeated.

PROTECTION

After drying, first sand the Wood Filler smoothly and finish with oil, varnish or wax.

IMPORTANT INFORMATION

Respect the requested proportions for the quantities that you need. Wood Filler is biodegradable and is classified as a non-dangerous product. This product is not flammable

SHELF-LIFE

In well-closed and original packing, if not prepared, minimum 12 months.

WAREHOUSING

by 10 – 40 °C

CLEANING

HYDRO CLEANER 7984
